RESEARCH ASSISTANT VACANCY IN HEC PROJECT

It is advertised for the interests of suitable candidate for the post of research assistant in HEC funded Project No. 5723 titled "**Fabrication of Sulfonated Polyimide Clay Based Nanocomposites as Fuel cell Membrane Material for Energy Application**", for a period of three years purely on contract basis.

Interested candidates are advised to send their CVs on the address of the undersigned to reach on or before 28/02/2018 (Closing time 04:00 pm).

The test/interview will be conducted on 28/02/2018 in the office of the undersigned. No TA/DA is admissible for test/interview.

NOTE: Preference will be given to the candidates having M. Phil (completed) or Ph.D (in progress), and having knowledge and experience in polymer and nanocomposites synthesis.

PI and the technical committee reserve the right to reject one or all the candidates if found unsuitable, and to cancel the test/interview without communicating any reason(s).

Dr. Farman Ali

Principal Investigator/Assistant Professor
